In [5]:
```
#1. Read First Line:-  Write a program to open sample.txt and print only the first
f = open("sample.txt")
l = f.readline()
print(l)
f.close()
```

```
I am Nandini Naresh Battul
```

In [7]:
```
#2. Write and Read Back:- Write "Welcome to the magical world of Python" into a fil
with open("sample.txt","w") as f:
    f.write("Welcome to the magical World of Python")
with open("sample.txt","r") as f:
    l = f.read()
    print(l)
```

```
Welcome to the magical World of Python
```

In [9]:
```
#3. Count Characters Read a file and print the total number of characters.
with open("sample.txt") as f:
    l = f.read()
    char = len(l)
print("Total Chars:- ",char)
```

```
Total Chars:-  38
```

In [1]:
```
#4.Print Specific Line Print the 3rd line from myfile.txt using readlines().
with open("myfile.txt","r") as f:
    lines=f.readlines()
    print(lines[2])
```

```
My Goal Is to become Data Analyst or Data Engineer
```

In [3]:
```
#5.Append Mode Add "This is appended text from write your name " to the end of a
f=open("myfile.txt","a")
f.write("This is appended text from Nandini Battul")
f.close()
print("This is appended successfully")
```

```
This is appended successfully
```

In [5]:
```
#6.Seek Practice Jump to the 10th character using seek() and print the next 5 ch
with open("myfile.txt","r") as f:
    f.seek(10)
    print(f.read(5))
```

```
ni Na
```

In [7]:
```
#7.Line Numbering Print each line with its line number (like 1: First line).
with open("sample.txt","r") as f:
     lno=1
     for l in f:
         print(f"{lno}:{l.strip()}")
     lno+=1
```

```
1:Welcome to the magical World of Python
```

In [9]:
```
# 8.Reverse File Content Read all lines and write them into another file in reve
f=open("sample.txt")
l=f.readline()
f.close()
f=open("Sample2.txt","w")
print(f.write(l[::-1]))
f.close()
```

```
38
```

In [11]:
```
#9.Word Frequency Counter Count how many times each word appears in a file and d
f=open("myfile.txt","r")
w=f.read().split()
freq={}
f.close()
for i in w:
     freq[i] = freq.get(i,0) + 1
print(freq)
```
